

Thursday March 19th : 9am – 3pm
 Friday March 20th : 9am – 3pm and 6pm – 9pm
 Saturday March 21st : noon – 4pm

Flandrau: The UA Science Center
<http://www.gotuasciencecenter.org/>

Brain Awareness Week is an international initiative to advance public awareness about the progress and benefits of brain research. The scientific community at the University of Arizona is organizing activities at the Flandrau Science Center to educate school children and the general public about how the brain works. The activities will include a brain zoo, perceptual games and illusions to demonstrate how different senses work and adapt. Activities are varied and suitable for all including school children ages 5 to 16.
